Department for Children and Families

Public Notice

The State of Kansas will submit by December 31, 2017, an updated annual report for administration of the block grant to states for Temporary Assistance for Needy Families (TANF). TANF provides assistance to low-income families with children and provides parents with job preparation, work, and supportive services to enable them to leave the program and become self-reliant.

Federal law requires that a specified percentage of TANF recipients be engaged in work, or work activities. In determining if a state meets its minimum participation requirement, a state is allowed a credit for reducing the size of its TANF caseload.

The Kansas Department for Children and Families (DCF) has prepared a report on its caseload reduction estimates and the methodology used to arrive at the estimates. Copies of this report, the state plan, and annual report are available by contacting DCF at 785-296-2968. Comments should be sent by December 15, 2017, to Judy Kennedy of the Kansas Department for Children and Families, 555 S. Kansas Ave., 4th Floor, Topeka, KS 66603. Comments may also be faxed to 785-296-6960 or emailed to Judy.C.Kennedy@ks.gov.

Notice to Contractors

Electronic copies of the letting proposals and plans are available on the Kansas Department of Transportation (KDOT) website at <https://kdotapp.ksdot.org/Proposal/Proposal.aspx>. The website will allow the contractor to request approval from KDOT to bid as a prime contractor and be included on the "Bid Holders List," or to be included on the "NonBid Holders List" as a subcontractor/supplier. KDOT's approval is required to bid as a prime contractor. To bid as a prime contractor, KDOT needs to be notified of the intent to bid no later than the close of business on the Monday preceding the scheduled letting date. Failure to obtain prior approval to bid as a prime contractor on any projects listed below will be reason to reject your bid. The secretary reserves the right to reject bids that do not comply with all requirements for preparing a bidding proposal as specified in the 2015 edition of the Kansas Department of Transportation *Standard Specifications for State Road and Bridge Construction*.

KDOT will only accept electronic internet proposals using the Bid Express website at <http://www.bidx.com> until 1:00 p.m. (CDT) December 13, 2017. An audio broadcast of the bid letting is available at <http://www.ksdot.org/burconsmain/audio.asp>.

Each bidder shall certify that such person, firm, association, or corporation has not, either directly or indirectly, entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding in connection with the submitted bid. This certification shall be in the form of a required contract provision provided by the state to each prospective bidder. Failure to complete the required contract provision and certify the completeness of the preceding statement when electronically signing the proposal will make the bid nonresponsive and not eligible for award consideration.

Goodyear Tire and Rubber Company PO Box 1069 Topeka, KS 66601	Kansas River via Soldier Creek	Process Wastewater

Kansas Permit No. I-KS72-PO02 Federal Permit No. KS0001643

Legal Description: NE¼, S13, T11S, R15E, Shawnee County, Kansas

Facility Location: 2000 NW U.S. Highway 24, Topeka, KS 66618

The proposed action is to reissue an existing State/NPDES permit for an existing facility. This facility is engaged in the manufacture of truck, off-road and specialty tires under the federal effluent guidelines, 40 CFR Part 428–Rubber Manufacturing Point Source Category, Subpart A–Tire and Inner Tube Plants Subcategory. An average wastewater flow of about 20,000 gallons per day, consisting of about 10,000 gpd domestic sewage and about 10,000 gpd effluent from the Industrial Process Wastewater Treatment Plant (IPWTP), is treated through a conventional activated sludge wastewater treatment plant (WWTP) that discharges through Outfall 001A1 prior to dilution with other flows. The conventional activated sludge WWTP includes aeration, clarification and aerobic sludge digestion. Prior to the conventional activated sludge WWTP, the site industrial wastewater sources are directed to the IPWTP. IPWTP processes consist of dissolved air flotation, chemical precipitation, clarification, carbon adsorption and filter press. The IPWTP effluent is directed to the domestic WWTP for further treatment and to serve as a WWTP carbon source for previously injected methanol. Hydraulic/cooling water, cooling tower blowdown, process wastewater and stormwater runoff from Plant I and power house boiler and compressed air blowdown after treatment through an oil/water separator, commingled with treated WWTP effluent from Outfall 001A1 domestic wastewater and Industrial Process Wastewater Treatment Plant (IPWTP) flows, are discharged through Outfall 001X1 to Soldier Creek. The average discharge flow is about 1.2 mgd. A two section oil/water separator and retention basin receives hydraulic/cooling water and process water from Plant II and sump wastewater throughout the site. About 2,000 gallons per day of sump wastewater is hauled by vacuum truck to the north section of the basin where the oil and wastewater is separated. The separated wastewater is returned by vacuum truck to the IPWTP and the separated oil is removed for disposal off-site. About 2,000 gallons per day of cooling and process wastewater from Tire Production Plant No. II is pumped into the south section of the retention basin which is maintained as non-discharging except potentially during extended precipitation events by returning the wastewater by vacuum truck to the IPWTP for treatment and discharge at Outfall 001X1. The proposed permit contains limits for biochemical oxygen demand, total suspended solids, E. coli, oil and grease, total residual oxidant, and pH, as well as monitoring for flow, total Kjeldahl nitrogen, nitrate, nitrite, total nitrogen, total phosphorus, total recoverable lead, total recoverable zinc, hardness, and whole effluent toxicity.
